## MEDIA RELEASE

### THE CHANGING FACES OF NORTHERN IRELAND

If you really want to look fabulous, it is well worth considering some of the exciting new beauty treatments that have now become available in Northern Ireland.

Thanks to new proven procedures, today everyone can enjoy a smooth, younger looking skin without the need for painful cosmetic surgery.

The White Light Skin Clinics led the field in introducing American style medico-beauty treatments into UK high streets and now they have opened a branch in Northern Ireland.

They specialise in a number of key areas including a range of anti-ageing skincare treatments for all ages.

**Their Glycolic and Salicylic skin peels** are really effective to remove dead cells, minimize fine lines and wrinkles and smooth uneven skin texture – if you want beautiful skin for a special event, this is an essential treatment.

**Skin fillers** are now an accepted way to get an instant result and ensure you look amazing. White Light work with a range of recognized collagen boosters and injectables – their highly qualified practitioners will explain all the options and treatments.

The great news is that these fillers are well proven and safe. They are also quick and easy, tiny amounts injected with a very fine needle by a highly qualified and experienced practitioner. A simple, comfortable treatment that can plump up those crows feet, lip lines, frown lines, wrinkles and skin folds in time for those special events.

**Red veins on your face or legs** are another problem that can be eradicated thanks to modern treatments. White Light use IPL (Intense Pulsed Light treatment) which destroy the broken blood vessels so that they are absorbed back into the body, leaving clear, blemish-free skin.

Then of course there are the exciting **permanent hair reduction treatments** – getting rid of regular shaving or waxing saves so much time and money but even better, after the treatments you will be left with beautifully smooth skin – longterm!

This list of impressive treatments at the White Light Skin Clinics goes on – treatments for acne and rosacea, sun damage, age spots – whatever the problem, it is worth having a chat with the friendly and highly experienced practitioners.

Once you have achieved that beautiful skin, The White Light Skin Clinics also offer some of the best skin care products and cosmetics including Susan Posnick mineral cosmetics.

A new White Light Skin Clinic is now open in the House of Fraser store in Victoria Square. Call on 0284 142 4500 to arrange a free initial consultation or visit [www.white-light.com](http://www.white-light.com) for more information.
