Sun Damage and Pigmentation

As we age, underlying sun damage from years gone by can start to appear, causing a less than perfect complexion. The good news is there are a variety of treatments to remove your pigmentation, leaving you with an even complexion and restored confidence.

Your journey starts with a **FREE no obligation skin consultation** where your practitioner will deep cleanse your skin, discuss your concerns and advise the best treatment programme and skincare products for you.

Protect your skin from future sun damage by using a high quality SPF - we love Heliocare, with a hint of colour. Many clients revert to using this instead of their regular foundation, as it gives such great coverage!
